

## Museo Pan Pro paper size setup

Here are the basic directions to build a user defined paper size for Museo PAN Pro panoramic paper.

1. Go to your control panel, select printers. Highlight your printer, then go: File / printer preferences.
2. Under paper options use the following settings: Source – Sheet / Type – Enhanced Matte Paper / Size – User Defined. This should then prompt you to create a new paper size for your drop-down window.
3. Use the following settings: Paper Size Name – Museo PAN Pro / Paper width – 1295 / Paper Height – 4000 / Unit – 0.01 inch. Select **Save** then **OK**
4. Select Advanced settings in the print driver. Select No Color Adjustments ( on some models you will have to select ICM under Color Management for this option to appear.

When printing you will now be able to select Museo PAN Pro as a paper size. The paper will feed from the regular sheet loader. For more printer specific information please acquire the appropriate printer specifications from our website.
